

ENVIRONMENTAL POLICY

The ultimate goal of Zakłady Drobiarskie Farmio Sp. z o. o. Poultry Plant is to maintain the image of a stable, environmentally conscious, well and efficiently managed, as well as providing opportunities for the development of the Company. The object of our business is the slaughtering of chickens, cutting, splitting, production, packaging, cooling and deep-freezing of raw meat products.

We operate in the belief that continuous monitoring of the fulfillment of interested parties requirements and continuous improvement of the Environmental Management System in accordance with the requirements of ISO 14001:2015 will ensure the achievement of the intended objectives.

We achieve our strategic goals by taking the following actions:

- ⇒ *conducting operations by qualified and experienced personnel with optimal use of resources,*
- ⇒ *compliance with applicable legal requirements, interested parties requirements, compliance obligations and any other requirements, as applicable, relevant to the organization's context, affecting the organization's ability to ensure compliance of the activities performed and relating to specific environmental aspects,*
- ⇒ *proper communication of environmental goals, raising the competence of employees through systematic trainings,*
- ⇒ *continuous improvement of the Environmental Management System,*
- ⇒ *prevention of environmental accidents and pollution and sustainable use of resources to improve the environmental performance of activities, carrying out environmentally safe management of waste and chemicals, and rational use of energy.*

We undertake to provide the necessary resources for the proper operation of the Environmental Management System, declare our commitment to improving the Environmental Management System, and achieve the set goals in line with the organization's strategic direction and the context in which it operates.
